

OTHER FAUNA

Snakes

Carpet Snake (*Morelia variegata*), one seen in the ruins of an abandoned timber mill at the head of the brook.

Gwardar (*Demausia nuchalis*), a specimen about 70 em. long was caught.

Lizards

Cryptoblepharus plagiocephalus several seen on tree trunks and on fallen limbs.

Menetia greyii (*Ablepharus greyii*) several in paddocks.

Trachysaurus rugosus three specimens seen crawling about.

Frogs

Three species of adult frogs were identified in Gingin Brook: *Criuia insignifera*, *C. georgiana* and *Hyla adelaidensis*.

—JOHN DELL

CORRECTION

Kendrick, Sedgwick and Smith (1971, *The Western Australian Naturalist*, 12 (1): 9) describe a shell of *Rhytida* (*Straugesta*) *georgiana* as having 2.7 whorls. This should be corrected to 3.7 whorls.
